If you have a space problem, we have the solution. The PLATE-MATE Stacking/Serving System saves space, labor, time and money. It speeds service too. All models are designed with adjustable arms. This allows for plates, dishes or trays of varying shapes and sizes to be quickly, simply and securely stored as well as removed with the greatest of ease. By adding a tray accessory, one model is capable of holding up to 20 large rectangular or oval trays.

The PLATE-MATE Stacking/Serving system has been especially designed and engineered to permit food to be prepared and plated in advance without taking up valuable counter space; thereby quickly freeing prep room for more course plating.
