

TABLE MODELS

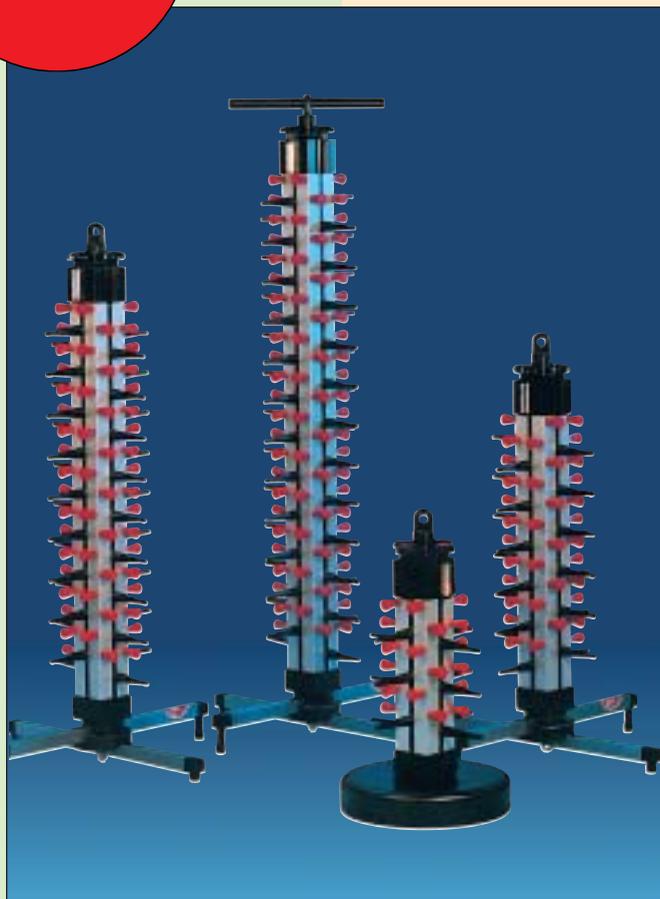

PLATE MATE offers various types of table models which, if desired, can be equipped with a hand grip and swivel wheels, two of which with brake.

Available Models:

Model	Capacity (Plates)	Height	Weight
TM 12	12	19.3" (49cm)	5.5lb. (2.5kg.)
TM 24	24	28.7" (73cm)	8.6lb. (3.9kg)
TM 36	36	36.6" (93cm)	11.5lb. (5.2kg)
TM 48	48	44.9" (114cm)	14.1lb. (6.4kg)

The smallest model has a capacity of 12 plates, while the capacity of the largest is 48. The column is made up of the same parts as those in all other models.

The table models have a suspension eye at the top, which means that these models can also be suspended from a hook, for example in an area for cold storage.

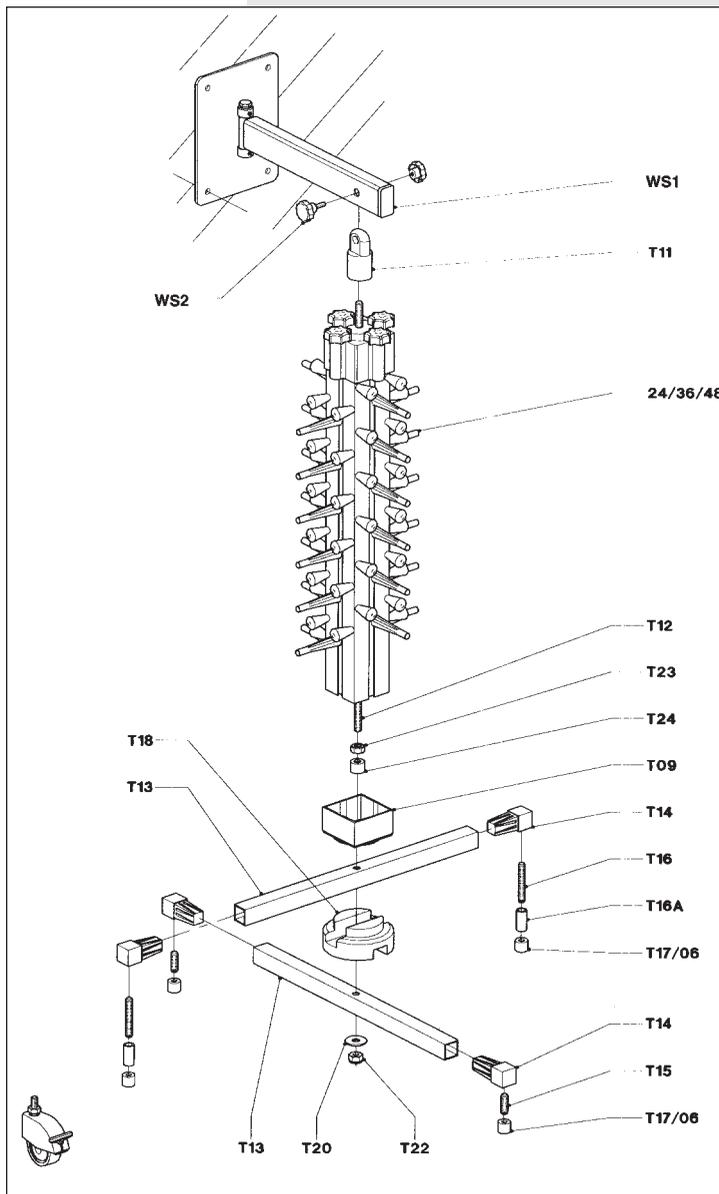

Plate Mate is the ideal solution!

TABLE MODELS

The table models can also be used at buffets. By draping a beautiful table cloth over such a model, you can make it part of your table. Start out by adjusting the table model exactly to your plate or bowl and then cover it with a table cloth. Once adjusted, the plates will fit perfectly into the table model and become part of your buffet table.

ASSEMBLY

Every table model can also be converted into a wall model by using the **WALL SUPPORT** (order code 820 LM), which is made of stainless steel and available as an option. We advise using two wall supports for the TM 36. When ordered as a wall model, the TM 48 is always provided with two wall supports. It goes without saying that the wall as well as the hardware used for attaching the unit to the wall must be made of quality materials. By using a simple fastening method, you will be able to use the PLATE MATE both as a wall model and, by removing the hardware, as a table model. When using the PLATE MATE as a wall model, the base can be removed.
